Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 10-18, 19 drawn to Operator Interface Processing – computer supported collaborative work supported by a plurality of workers, classified in class 345, subclass 700, 751.
 - II. Claims 20-42, drawn to Data Processing: Financial, Business Practice, management or Cost/Price Determination ... staff scheduling or task assignment, classified in class 705, subclass 8, 9 and/or 34, and/or drawn to Data Processing: Presentation and Processing of a document classified in class 715, subclass 513.
- II. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a bid manager, a resource and contact manager, and a reports manager are not required for schedule and document integration. The subcombination has separate utility such as human resources personnel management, and report generation.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
